

Juni Dio Kasandra

Jakarta • junidio.kasandra@gmail.com • (+62) 81261853337 • [linkedin.com/in/junidio](https://www.linkedin.com/in/junidio)

Results-driven Backend Engineer with 5+ years of experience in designing and developing scalable microservices, system optimization, and API integrations. Adept in Go, Python, and NodeJS, with deep expertise in cloud infrastructure, distributed systems, and database management. Proven ability to deliver reliable backend solutions, reduce system bottlenecks, and collaborate cross-functionally in agile environments

Professional Experiences

Backend Engineer

Mekari (Mekari Jurnal)

June 2025 – Present (Fulltime, Hybrid)

- Developed backend features for high-scale accounting platform serving business operations.
- Discover and fix architecture and system's pattern issues.
- Collaborated with product, QA, and frontend teams to deliver scalable financial platform features in agile sprints.
- Designed and optimized MySQL database schemas, leveraging indexing for performance gains.
- Enhance existing features to increase system performance.
- Investigated and resolved production issues in distributed environments.
- Maintained >90% unit test coverage for newly developed features.
- Automated development workflows using AI-assisted tooling and MCP integrations to improve engineering productivity.

Stack: Golang, Echo, MySQL, Redis, Docker, Kubernetes, Python, Github Copilot/Claude, Ruby On Rails, Kafka, Alicloud

Backend Engineer

Sapphire Skyscraper (Pinjamin App)

February 2025 – May 2025 (Fulltime, Onsite)

- Engineered scalable backend architecture using Go and microservices pattern
- Designed and optimized MySQL database schemas, leveraging indexing for performance gains.
- Implemented Redis-based caching strategies to significantly reduce response times.
- Built CI/CD pipelines with Jenkins and deployed services via Kubernetes.
- Selected and integrated tech stacks to support high-performance web operations.

Stack: Golang, MySQL, Redis, Docker, Jenkins, Kubernetes, Etc, Gin, GORM, Huawei Cloud

Backend Engineer

PT Bank Rakyat Indonesia (Briguna App)

January 2024 – February 2025 (Contract, Hybrid)

- Integrated government services to mitigate non-performing loans.
- Improved response time by 20% through Redis optimization and batch query processing.
- Fixed Redis/Cache issue by readjust the Redis usage using singleton and pooling.
- Automated recurring troubleshooting tasks using internal APIs and scripts.
- Led service migration efforts from monolith to microservices architecture.
- Maintained unit test coverage >90%; authored OpenAPI 3.0 documentation.
- Developed internal Go packages and a Python document patcher tool.

Stack: Go, Python, NodeJS, PHP, PostgreSQL, MySQL, Redis, Kafka, Docker, Kubernetes, gRPC, Grafana, GORM

Backend Engineer

Kopwar (Gem Job Portal App)

October 2022 – December 2023 (Contract, Remote)

- Built backend for job-seeker platform; designed and managed PostgreSQL schemas.
- Developed 3 microservices with inter-service communication.
- Implemented email and SMS notifications; deployed services on AWS Lambda.

Stack: Go, PostgreSQL, AWS Lambda, AWS SES, AWS Gateway, REST API, Gin

Backend Engineer

Koinworks (Koinneo App)

May 2022 – September 2022 (Fulltime, Remote)

- Enhanced and maintained loan features; integrated with internal microservices.
- Conducted issue tracing, performance logging, and root cause analysis.
- Contributed to sprint planning, grooming, and daily stand-ups.

Stack: Go, Python, PostgreSQL, Kafka, Docker, gRPC, Datadog

Odoo Developer

Hashmicro Solusi Indonesia (ERP Software)

September 2021 – February 2022 (Freelance, Remote)

- Customized Odoo modules (Invoice, Sales, Inventory, Purchasing).
- Generated PDF reports; collaborated with ERP consultants.

Stack: Python, Odoo, PostgreSQL, XML, JS, HTML/CSS

Backend Engineer

Multipolar Technology Indonesia (Software Service)

November 2020 – April 2022 (Fulltime, Remote)

- Built routing microservices for ISO20022 message handling.
- Maintained >60% test coverage and collaborated with QA for end-to-end validation.

Stack: Go, Python, Kafka, Docker, MongoDB, ISO20022, JSON

Education

- **Andalas University**
Bachelor of Computer Engineering
- **Bangkit Academy - Led by Google, Tokopedia, Gojek & Traveloka**
Machine Learning

Skills

- Languages: Go, Python, NodeJS, PHP, Java
- Frameworks & Tools: gRPC, GraphQL, REST, Docker, Kubernetes, Git, OpenAPI
- Databases: PostgreSQL, Redis, Kafka, MongoDB
- Cloud & DevOps: AWS Lambda, SES, CloudWatch, GitHub Actions, Linux

Interests

- Distributed Systems
- Platform Engineering
- Developer Experience
- Remote-first Engineering Teams
- AI Engineering
- Financial Engineering
- Microservices
